

# Brandon Church

Senior Front-End Architect • AI Integration & Prompt Engineering Specialist

**Phone:** 803-522-1065 **Email:** brandonleochurch@gmail.com **Portfolio:** [brandonchurchportfolio.com](https://brandonchurchportfolio.com)

## Professional Summary

Front-end architect who builds scalable design systems and AI-powered solutions that transform user experiences. First UX hire at Leidit who architected their entire design system and grew to Director. Recognized WCAG compliance expert who ensures Section 508 accessibility across all government applications. Founded Modern Softworks, shipping innovative products including SnapShot AI, an AI-powered Chrome extension for visual content analysis. Pursuing MS in AI/ML to formalize deep expertise in LLM integration. Driven by creating technology that fundamentally improves how people work.

## Core Competencies

### Front-End Architecture & Design

- React, Redux, TypeScript, Next.js, Angular
- Jest, React Testing Library, Cypress
- Advanced CSS, Tailwind, Three.js, Canvas API
- WCAG 2.1/Section 508 Compliance Expert
- Webpack, Vite, Performance Optimization

### Backend & Systems

- Node.js, Python, GraphQL, REST APIs
- PostgreSQL, MongoDB, Redis, SQL
- AWS (Lambda, S3, EC2), Azure
- WebSockets, Service Workers, PWAs
- Docker, CI/CD, GitHub Actions

### AI Integration & Prompt Engineering

- OpenAI (GPT-4), Claude, LangChain
- Prompt Design & Optimization
- Vector Databases, RAG Systems
- Hugging Face, Model Fine-tuning
- AI-Powered Feature Development

### Leadership & Strategy

- Team Leadership, Architecture Decisions
- Agile/Scrum (CSM)
- Client Relations, Project Planning
- Business Development, SEO
- Accessibility Training & Auditing

## Professional Experience

### Director of UI/UX

Leidit • Remote

February 2023 – Present

- Hired as first UX developer, architected entire company-wide design system from scratch across multiple government projects
- Promoted to Director after establishing UI/UX standards; now lead team of developers while maintaining hands-on architecture role
- Serve as company's sole WCAG compliance expert, training team on accessibility standards and achieving 100% Section 508 compliance
- Built ServiceNow component library reducing development time by 60% across all projects
- Reverse-engineered complex legacy widgets, rebuilding with modern patterns and accessibility compliance
- Established mentorship program and code review process that improved team velocity by 40%

**Founder & CEO**  
Modern Softworks • Remote

September 2020 – Present

- Built and launched SnapShot AI Chrome extension enabling visual content queries via GPT-4 integration
- Developed scalable template system that reduced client website delivery from weeks to days
- Architected custom chatbots and AI solutions for 10+ clients using OpenAI and Claude APIs
- Led team of 5 developers before strategically pivoting to solo operation during market downturn
- Created and marketed UI/UX auditing frameworks as successful digital products
- Integrated AI across entire business operations, from development workflows to client acquisition

**Senior UI/UX Developer**  
Jobvite • Remote

January 2022 - February 2023

- Architected and delivered 5+ enterprise career portals from Figma designs, establishing reusable component libraries
- Built modular front-end architecture with advanced SEO optimization, achieving 95+ Page-Speed scores
- Integrated Telemetry CMS with custom middleware, creating patterns later adapted for AI-enhanced features
- Established accessibility standards exceeding WCAG 2.1 AA compliance across all deliverables

**Front-End Developer**  
Rural Sourcing Inc. • Remote

March 2020 - January 2022

- Architected complete React-based application still in production serving 10,000+ daily users
- Designed scalable component architecture and state management system from ground up
- Established front-end best practices and documentation adopted by 15+ developers
- Collaborated with backend teams to optimize API design, reducing load times by 40%

**Full Stack Developer**  
MAP Academy Tutors • Remote

January 2018 - March 2020

- Led 5-person agile team while architecting entire front-end system and Azure cloud infrastructure
- Designed and implemented responsive UI increasing user engagement by 60%
- Built RESTful APIs and integrated Azure SQL databases for real-time data synchronization
- Established CI/CD pipeline and automated testing framework for rapid deployment

**Freelance Full-Stack Developer**  
Self-Employed • Remote

April 2016 - September 2020

- Delivered 40+ projects for small businesses, from simple sites to complex web applications
- Developed reusable template system that reduced project delivery time by 75%
- Built Chrome extensions, React Native mobile apps, and Unity-based web games
- Maintained 5-star rating on Upwork with consistent client base leading to Modern Softworks founding

- Promoted from technician to manager, leading team of 3 supporting 20+ businesses including medical offices and schools
- Managed thousands of devices including servers, workstations, VOIP systems, and network infrastructure
- Led critical migrations and upgrades for healthcare providers ensuring HIPAA compliance and zero downtime
- Imaged and deployed thousands of devices for county school system while completing Computer Science degree
- Transitioned to software development after establishing strong foundation in enterprise IT infrastructure

## Education

---

Master of Science, Computer Science – AI and Machine Learning  
Western Governors University • Expected Completion: 2026

Bachelor of Science, Computer Science (In Progress)  
Western Governors University • Accelerated BS/MS Program

Associate of Science, Computer Programming  
Augusta Technical College • Augusta, GA

## Certifications

---

- Certified Scrum Master (CSM)
- Google Digital Marketing Certification
- Microsoft MTA: HTML and CSS
- CompTIA A+, Network+, Security+
- Additional: JavaScript, C#, C++ Developer Certifications

## Notable Innovations

---

- SnapShot AI: Chrome extension allowing users to analyze any on-screen content with GPT-4
- Personal AI Assistant: Built home automation system using Raspberry Pi, security cameras, and OpenAI API for context-aware responses
- ServiceNow Design System: Architected component library used across all Leidit government and internal projects
- Accessibility Audit Framework: Developed comprehensive WCAG testing methodology adopted company-wide
- Scalable Template Engine: Reduced website delivery time from 3 weeks to 3 days through automation
